2.9 SPBS is not permitted to perform any work other than the above unless it is approved by the Deputy Registrar of SPS.

CHAPTER 5 – SCHOLARSHIP MONITORING PROCESS

School of Graduates Studies of UTM (SPS UTM) is currently in the process of implementing a scholarship monitoring process that will address the lack of progress updates from the scholarship' and grants' receipt.

Monitoring is a continuous function that uses the systematic collection of data on specified indicators to provide SPS and the faculties of an ongoing scholarship intervention and monitoring with indications of the extent of progress and achievement of objectives and progress in the use of allocated funds.

Monitoring gives information on where a policy, program, or project or anything related to the scholarship and its receivers (the students) at any given time (and overtime) relative to respective targets and outcomes set by SPS or as per agreed in their initial scholarship contract. It is descriptive in intent.

Below is a few of many monitoring methods suggested that are able to help both SPS and students in managing the scholarship effectively;

<p>1) Meetings</p>	<p>SPS and student shall meet compulsorily at least twice per semester (early and end of the terms). The meeting shall be chaired by the dean for every meeting or by the deputy dean in the absence of the dean.</p> <p>This meetings gives both side a chance to meet and discuss the current progress of their studies and to ensure that the students are still on track on their PhD/Master completion.</p> <p>Those students who falls out from the expected schedule will be having separate session with SPS to determine the cause and the solution to help them back on tracks.</p>
<p>2) Feed back analysis by questionnaires / feed back form</p>	<p>The continuous progress of PhD/Master completion of the scholarship receivers shall be monitored and accountability fixed on the students based on the feed back analysis from them. The analysis results shall be monitored by SPS to ensure the scholarship are well used.</p> <p>The feedback forms will be distributed online via google documents for easy data collection and analysis by SPS.</p>
<p>3) Checklist/ Benchmark list</p>	<p>There shall be prescribed checklist to students in the beginning of the semester.</p> <p>This checklist is a list for students to ensure that they have complied to all terms and condition set as per their scholarship agreements such as;</p> <ul style="list-style-type: none"> Subjects registering Examination schedule / reminders Thesis submission Progress report Workshops Competition

	<p>SPS may enforce a benchmark for student to follow to ensure they stays active and updated in terms of universities activities or thesis progress. For example; the student need to attend at least 3 courses or workshop.</p> <p>This checklist shall be duly authenticated by the students at various levels and they shall be accountable at their level.</p>
4) Guidebook	<p>A specific guidebook tailored to the PhD/Masters students's need may as well be prepared and distribute at early of the semester together with the simplified check list mentioned above.</p> <p>This guidebook in typed script or in any other mode as prescribed regarding the whole process of before, during until the student graduate.</p> <p>This guide book are a reminder to them and will be updated from time to time.</p>
5) Offering relevant short courses/ workshop/CSR programme to the students	<p>SPS may offers relevant short courses and workshops to the students for them to attend from time to time. This courses will be related to them such as thesis writing etc.</p> <p>Also, Corporate Social Responsibility Programme (CSR) may be held involving both sides as additional social activities.</p> <p>A certificate of acknowledgement will be given to the students.</p>
6) Online progress monitoring by CICT / SPS	<p>Scholarship unit with the help of CICT also monitoring the students via online system ; AIMS / progress report.</p>
